

ETS Solutions Shaker Features

From Inquiry to post-installation support, we want you to have the best experience possible with ETS Solutions

Overview

- ETS designs and manufactures shakers from 440lbf to the world's largest 151,000lbf
- ETS has 5 models of induct-a-ring style shakers from 8,800 to 40,000lbf
- ETS service arm CVMS, performs field service on all shakers and has armature, stator and field coil rewind service in our LA facility.
- ETS supplies plug-compatible, replacement amplifiers for any make, any model shaker
- Starting in 2019, ETS offers US Assembly meaning >51% US content meeting "Buy American" policies
- ETS has supplied to US Military, government agencies and defense/aerospace contractors, CAGE 6CUM6
- ETS can match armature, head expander and slip table insert patterns to accommodate existing fixturing
- Once a specific configuration is selected, ETS can enter a system in pre-build, starting the clock with no financial obligation to MPC. ETS delivery is significantly less than any major competitors
- Upon a PO, ETS will supply system infrastructure and installation drawings and dimensional drawing to plan your test area
- Most common replacement parts are world-sourced, COTS, available at suppliers like McMasterCarr or Grainger
- ETS shakers are turn-key, the best value in the industry
- ETS TestSmart environmental chambers for temp cycling, AGREE, thermal shock built on the ISO9000 line ETS purchased in Asia. Chambers feature Tidal Synergy controls.

Please contact Smithson & Associates for all your environmental test equipment needs and to discuss your application.
